

AWGA Press release

12 July 2013

Trisolfen gains Over the Counter status.

On 28th June, The Australia Federal agency, Therapeutic Goods Administration (TGA), gave the green light that Trisolfen should be available to be sold over the counter (OTC) to woolgrowers via normal retail outlets. It is thought that retail sales will be available after February 2014.

AWGA welcomes this decision made by TGA, which now allows much easier access and price competition for woolgrowers wishing to use Trisolfen.

AWGA recognises that for many growers, access and availability have been two hurdles that made pain relief at mulesing difficult for many farmers in remote location

This positive outcome of rescheduling of Trisolfen from S4 to S5, allows more public education of Trisolfen in the marketplace. Previously under an S4 status, Trisolfen was not allowed to be advertised.
