Important message from Genevieve re country or origin labelling laws... Everyone is free to participate

The government have been holding industry consultation during April and May 2015 regarding country of origin labelling and are currently running a survey to gauge the views of consumers (with the feedback to be considered in the development of the Commonwealth's proposals, with a working group of Ministers representing sectors including industry, agriculture, small business, health and trade to develop the Government's position on improvements that do not impose excessive costs on industry).

We encourage you to distribute the details of the survey to your membership, to ensure their views are heard. The survey to gauge consumer opinion is open from 8am Tuesday 9 June 2015 until Friday 3 July 2015. The survey can be found at: www.industry.gov.au/cool .
